MANUFACTURER OF FLAT ROLLED STEEL

Aisha Steel Mills Limited (ASML) is part of Arif Habib Group. ASML is premium seller and exporter of CRC and GI products to local and international markets. ASML is state-of-the-art flat rolled steel manufacturer with annual rolling capacity of ~850,000mt (~600,000mt cold rolled steel and ~250,000mt galvanized steel). ASML is the only CRC manufacturer in Pakistan that use Electrolytic Cleaning Line (ECL) for Auto Grade Sector.

COLD ROLLED STEEL SHEET IN COILS

Standards & Grades

ASTM	A 1008
JIS G-3141	SPCC, SPCC, SPCE, SPCE/IF
EN 10130	DC 01
or equivalent	

Thicknesses

0.15 mm to 3.0 mm
0.006 in to 0.118 in

Widths

650mm, 800mm, 1000mm, 1070mm, 1200mm, 1250mm, 1290mm,
25.59 in, 31.5 in, 39.37 in, 42.12 in, 44.09 in, 48 in, 49.21 in

Surface Finish

Matte/Bright

PRIME HOT DIPPED GALVANIZED STEEL SHEET IN COILS

Standards & Grades

ASTM	A653 CSB, GR23
JIS G-3302	S55C, SGCH, SGCD
EN 10346	DX51D
or equivalent	

Cooling

Z08 to Z27
G90 to G90
80 GSM to 275 GSM

Thicknesses

0.25 mm to 2.5 mm
0.010 in to 0.098 in

Widths

650mm, 800mm, 1000mm, 1070mm, 1200mm, 1250mm, 1290mm,
25.59 in, 31.5 in, 39.37 in, 42.12 in, 44.09 in, 48 in, 49.21 in

Basic Facts About Pakistan

Official Name:	Islamic Republic of Pakistan.
Founder:	Quaid-e-Azam Muhammad Ali Jinnah.
Capital:	Islamabad.
Area:	803,940 Sq. Km.
Population: (2023):	241.49 Million
GDP (2023):	338.24 Billion
Currency:	Pak Rupee.
Major Cities:	Islamabad, Karachi, Lahore, Peshawar, Quetta, Faisalabad, Multan and Sialkot.
Major imports:	Industrial Equipment, Chemicals, Transport Equipment, Construction Equipment, Steel, Iron Ore, Petroleum, Edible Oil, Pulses, Tea.
Major Exports:	Surgical Goods, Textiles, Rice, Leather Goods, Sports Goods, Chemicals, Carpets and Rugs.
Exports (2023)	USD 28 Billion.
Export - Partners:	US, China, UK, Germany, Netherlands, and Spain
Major Crops:	Cotton, Wheat, Rice, Tobacco, Sugarcane.
Industries:	Mechanical & Electrical Goods, Cement, Fertilizers, Sugar, Steel, Textiles, Apparel, Food Processing, Paper Products, Surgical, Pharmaceuticals, Construction Materials.
Languages:	English (Business), Urdu (National/Official)
Government:	Parliamentary Form.
Sports:	Cricket, Hockey, Football, Squash, Polo.
Tourist Resorts:	Murree, Quetta, Hunza, Ziarat, Khewra, Chitral, Kaghan and Gilgit.
Archaeological Sites:	Mohinjodaro, Harrapa, Taxila and Thatta.
Road Network:	264,401 Km.
Sea Ports:	Karachi, Bin Qasim and Gawadar.

Engineering Development Board

Engineering Development Board was established in 1995. The primary mandate assigned to the board is policy formulation and implementation for facilitating and encouraging development & growth of the Engineering Industry of the country. Later it was decided that EDB shall function as an apex policy and decision making autonomous body for all aspects concerning the Engineering Industry as per its terms of reference. EDB implemented indigenisation programs, carried out the tariff rationalisations, and other sectoral/business development activities for different engineering sectors.

Engineering Development Board was established on 15th May 1995 with the following terms of reference.

- Develop a long-term vision for the development of the engineering sector.
- Formulate and coordinate all government policies relating to the engineering sector.
- Develop an overall strategic engineering development plan.
- Promotion of export.
- Enhancement of technical training.
- Formulate policies and guidelines for utilisation of technology development and engineering funds.
- Appeal for grievances.
- Management of deletion / indigenisation policy.

Vision

To make the Engineering Industry in Pakistan the largest export sector of the country by 2030.

Mission

Strengthen the Engineering sector and integrate it with the world market in order to make it the driving force for economic growth.

MESSAGE FROM THE FEDERAL MINISTER FOR INDUSTRIES & PRODUCTION

With great pleasure I would like to congratulate the Engineering Development Board (EDB) for compiling the 5th edition of “**Directory of Engineering Goods Exporters 2024**”, I feel that the document is a platform that would serve as a bridge to connect all stakeholders in our dynamic industrial landscape to promote Pakistan's engineering capabilities and highlight its potential and expertise in the local as well as International markets. This document shall indeed serve as a basis for my Ministry's efforts to present the "Engineering Face of Pakistan" by highlighting the country's manufacturing sector potential, which is crucial for entering the global supply chain. This pictorial Directory, contains profiles of leading Pakistani engineering sector exporters would serve as a implicit exhibition of product and services that we have to offer to the world.

I would also like to express my appreciation for the resilience and determination shown by our industrial community, especially during challenging times. Your dedication to maintaining operations, and contributing to economic stability has not gone unnoticed. Together, we have overcome obstacles and continued to progress towards our shared goals.

Looking ahead export oriented growth strategy for economic stability remains to be the top priority of the present government. This is only achievable through exports of value added products. Our commitment is the expansion of international and regional trade for which we need to promote the country's image as a subcontracting destination from where quality products can be supplied to global markets.

Furthermore, I also wish to emphasize the importance of collaboration and partnerships. By fostering strong relationships between government agencies, industry associations, academic institutions, and businesses, we can create synergies that drive innovation, facilitate knowledge sharing, and address common challenges more effectively.

Let us continue working together towards a prosperous, sustainable, and inclusive future for all. I look forward to see the positive impact of this publication on our nation's export sector.

I wish EDB all the best for its success and contribution to the country's economic growth.

Rana Tanveer Hussain

MESSAGE FROM SECRETARY, INDUSTRIES AND PRODUCTION

It gives me great pleasure to offer my appreciation to the team of Engineering Development Board for publication of this comprehensive **"Directory of Engineering Goods Exporters 2024"**. It is encouraging to note that the previous versions of this Directory were widely distributed and recognized by the stakeholders both in the international and local market.

I am proud to acknowledge that EDB, being an integral arm of Mol&P, has always played a significant role in supporting and facilitating the engineering industry of Pakistan. It has helped increase engineering goods and services exports via successful promotional measures such as coordinating Pakistan's participation in international trade fairs and arranging trade delegation trips to target countries. This publication adds another feather to EDB's cap, highlighting the country's existing capabilities as a tool for broadening the scope of trade activities and providing opportunities for business development and networking among foreign investors/companies looking for trade partners in Pakistan.

This critical publication contains detailed profiles required by importers of engineering products to further improve trade and business prospects of the country globally and for furthering our efforts to becoming a hub of collaboration. The Directory comprises profiles/databases for more than 200 exporters and shows EDB's efforts to successfully promote the engineering capabilities of the local engineering industry. I am hopeful that this document will contribute favorably to the country's export growth. I commend EDB's management on their persistent efforts to promote the engineering sector's export capabilities, which is critical to enter the international trade arena and become a part of the global supply chain.

Looking ahead, I am optimistic about the future of our export oriented industry. We have a strong industrial base and a clear vision for export growth. By staying focused, consistent, and resilient, I am confident that industry will continue to increase its share of exports at desired level.

Saif Anjum

**MESSAGE FROM
CHAIRMAN, BOARD OF MANAGEMENT,
ENGINEERING DEVELOPMENT BOARD**

The “Directory of Engineering Goods Exporters” is a regular publication that EDB compiles in view of the requirements for promotion of Pakistan's image as an Exporting country. The profiles of exporters give a fair idea of the industry's capabilities and potential. This is a commendable initiative of Engineering Development Board (EDB) in terms of portraying the “Image of Engineering Industry in Pakistan”. I am hopeful that this export oriented publication shall contribute significantly to the country's export growth.

In today's competitive market, having access to comprehensive information like the one is invaluable for businesses seeking potential partners, buyers and markets. I am sure that this publication will not only benefit individual exporters but will also contribute to the overall growth and export enhancement of the country.

I believe that the engineering sector plays a pivotal role in driving innovation, creating employment opportunities and contributing significantly to our country's GDP. By compiling and disseminating valuable information about engineering goods exporters, this publication not only showcases the capabilities and expertise of our domestic industries but also facilitates connections and collaborations at a global scale.

This comprehensive document of Pakistan's top 222 engineering product exporters includes their product range and other key information, serves as a database that is being developed and updated on regular basis to add new companies and firms. Domestic engineering industry needs such a platform to effectively enter global markets.

I anticipate that this Directory will not only help to broaden the scope of export activities, but will also provide opportunities for business development and networking among foreign investors/companies looking for joint ventures or technical collaboration agreements with Pakistani companies.

I congratulate EDB's Business Development team on the publication of this new edition of the **"Directory of Engineering Goods Exporters 2024"** and their continuous efforts to promote Pakistan's engineering goods and services industry.

Arif Saeed

**MESSAGE FROM
CHIEF EXECUTIVE OFFICER,
ENGINEERING DEVELOPMENT BOARD**

I am delighted to present the updated version of **"Directory of Engineering Goods Exporters 2024"**, a comprehensive guide aimed at enhancing our nation's export capabilities of value added industries. This publication is a testament to our commitment for fostering a thriving export oriented industry that contributes significantly to the economic growth. The Engineering Development Board, started publication of this document in 2013 with the goal of providing market growth support to Engineering Sector SME's through different facilitation programs.

The primary aim behind compiling this pictorial guide is to provide a platform for our exporters and stakeholders to showcase their products and services to a global audience, we are helping to open doors to new opportunities and markets, driving innovation and driving economic prosperity for our industries.

The recognition that EDB has got from the business community, foreign missions, Pakistan's missions abroad, and numerous local/foreign chambers has given us a lot of encouragement to go for its regular updation of this document. The dedication and commitment of our Business Development team members who contributed towards its compilation is highly commendable and I congratulate them on producing this useful document.

I would like to extend my gratitude to all of the Industries and Associations that responded and submitted updated profiles enabling us to compile this important Directory. I hope to see further improvements in the next edition for which your valuable feedback would be appreciated. I would also like to utilize this platform to emphasize the necessity of product standardization/certification to the local industry, which is a pre-requisite for export growth, particularly in developing countries. As the globe becomes increasingly mindful of product quality, it is critical to get product certifications so that importers may securely choose Pakistani products.

EDB is dedicated to support exporters across all industries, promoting sustainability, and competitiveness in the global market. Through strategic partnerships, policy initiatives, and targeted assistance programs, we aim to unlock new opportunities and drive economic prosperity for all.

EDB will continue to assist engineering sector exporters as needed and we look forward to a long-term relationship with our industry.

Engr. Khuda Bukhsh

LOOKING FORWARD

I am pleased to present the latest edition of the EDB's Exporters Directory of Engineering Goods & Services, a critical instrument in our collective pursuit to present Pakistan's engineering sector capabilities for exports to the world. This Directory encapsulates the extraordinary strides made by our industry, serving as both a mirror of our current manufacturing capacities and a beacon guiding us towards a bright future.

In an era marked by rapid technological evolution and volatile global markets, the resilience and adaptability demonstrated by Pakistan's engineering sector has been nothing short of remarkable. Our industry has not merely weathered the challenges of the past year but has thrived, making significant headway in expanding our global footprint, enhancing the capabilities of our manufacturing processes, and embedding innovation at the core of our business strategies.

This Directory is a testament to the collaborative efforts of our manufacturers and exporters who have diligently worked to elevate the stature of Pakistani engineering goods on the world stage. It is more than a mere compilation of data; it is a strategic tool designed to bridge our industry with global markets, fostering connections that are essential for sustained growth and development.

As we look forward, the EDB reaffirms its commitment to driving the sector's growth through targeted initiatives, robust policy frameworks, and fostering an ecosystem conducive to innovation and excellence. Our goal is not only to meet the current demand of the global market but to anticipate and shape the future of engineering goods, positioning Pakistan as a leader in this dynamic field.

I extend my deepest appreciation to all stakeholders who have contributed to this edition and the EDB's dedicated editorial team. Their unwavering commitment and visionary approach is the driving forces behind our progress. As we continue on this path, I am confident that the synergies created through our collective efforts will propel Pakistan's engineering sector to unprecedented heights.

Let us move forward with a shared vision of excellence and a steadfast commitment to making our mark on the global stage.

Raazia Shakir

ENGINEERING DEVELOPMENT BOARD

A.N ENGINEERING INDUSTRIES (PVT) LTD

Company Profile:

A.N Engineering is a leading Auto Parts manufacturing company with more than sixty years of experience in automotive industry. The company practices modern techniques to produce Ferrous and Alloy Ferrous castings .The product line includes Engine valves ,Valve guides, Casting and machining, Idler Gears, Cam Shaft Gears, Fuel Pump Drive Gears, Water pumps, Front wheel hubs, Pulley Crankshaft, Cover Rear Axel Drive, Gear Shift Tower & Spacer Front Support. A.N Engineering is supplier to various OEMs in the country and are also exporting to various regions.

Core Competence: Engine valves and guides

Year of Incorporation:	1944
No. of Employees:	100
Export Destinations:	UK, Ireland, Lybia, Turkey, Japan, Poland USA, Germany, etc.
Certification:	ISO 9001

ALSONS INDUSTRIES (PVT) LTD

Company Profile:

Alsons Industries (Pvt.) Ltd, part of Alsons Group is specialized in manufacturing of Machining of Mechanical Components (from Bars, Plates, Forgings and Castings), CNC Plastic Injection Molding, Stamping and Assemblies in the fields of General Engineering, Aerospace, Automotive, Oil and Gas, Power Sector and; and has been exporting to Europe since 1993. Alsons has the capabilities to meet all technical challenges and has much experience in progressive innovation. With the availability of Hi-Tech equipment Alson Industries has the capability to manufacture complex components and assemblies with consistent and World Class quality.

Core Competence: Hi-tech Precision Engineering components, Turning, Milling, Aluminum Gravity Die Casting, Aluminum High Pressure Die Casting, CNC Plastic Injection Moulding, Stamping, Assemblies, CAD/CAM, Surface Treatment, Heat Treatment, Testing & Calibration

Year of Incorporation:

1953

No. of Employees:

482

Export Destinations:

Exporting to France, Belgium, Germany, Italy and Spain.

Certification:

ISO 9001: 2015 (Quality Management System) and ISO 14001: 2004

PAKISTAN ACCUMULATORS (PVT) LTD

Company Profile:

Pakistan Accumulators has been producing various types of automotive and inverter batteries, under the brand name of "VOLTA" and "OSAKA", for more than 25 years. This was initially done with technical support from Chloride Industrial Batteries Limited, which is a subsidiary of Hawker Batteries UK. PAL also introduced 2 Volt batteries from 200 AH to 3000 AH, Electric Bike Battery, Golf Cart battery. After being pioneers in introducing Maintenance Free Battery for the first time in the history of Pakistan, PAL has achieved another milestone by introducing Valve Regulated Lead Acid Battery (VRLA Battery) and Tubular Batteries in Pakistani market, with no need of initial charging and water checks required, making it 1st choice for the buyers giving efficient and longer backup time.

Core Competence: 12 volt JIS (Japan Industrial Standard) dry charged automotive batteries ranging from 32 AH to 220 AH, Sealed Maintenance Free Calcium+ batteries ranging from 35 AH to 150 AH, Motorcycle Batteries ranging from 3.5AH to 9 AH, VRLA (FMX, GFM) batteries and Tubular Batteries ranging from 100 AH to 165 AH.

HEATING, VENTILATION, AIR CONDITIONING AND REFRIGERATION

ENGINEERING DEVELOPMENT BOARD

AIRENG COMPANY

Company Profile:

The AIRENG Company is offering Centrifugal Fans, Hi-Pressure Fans, Axial Fans, Dust Collectors, Cyclones, Air handling equipment in the Fan Industry. This efficient, economical and compact line of Fans and fan-based machinery is produced in a new modern plant equipped with the fine metal fabrication machinery. Skilled craftsmen, backed by experienced designed engineers, combined with new facility; assures the best in the Quality Equipment.

Core Competence: Industrial Fan

Year of Incorporation:	1996
No. of Employees:	100
Export Destinations:	Bangladesh
Certification:	ISO 9001:2015

NEW ERA INDUSTRIES (SMC) PVT LTD

Company Profile:

New Era Industries is an established enterprise with a large manufacturing plant for uPVC door and window profile sections. The company's in-house manufacturing and widespread distribution throughout Pakistan position it as a leader in this field. uPVC doors and windows from New Era Industries are known for being eco-friendly, economically priced, and offering high value to users. They are water and weather-resistant, reducing noise pollution by 30 to 40 decibels. Additionally, they require low maintenance, eliminating the need for painting or polishing, unlike wood and aluminum.

Core Competence: UPVC Doors & Windows, PVC Wall Panels
